Be Bold, Be Creative, Be the Next Protégé

Apply at microsoft.com/en-au/protege/
Are you the next Microsoft Protégé?

Protégé is Microsoft’s annual case competition which offers students an opportunity to build on their classroom learning and tackle real challenges.

The Challenge

Rapid advancement and innovation is creating incredible new opportunities, but the pace of change and new skills requirements are pushing some of these exciting opportunities out of reach for many people living in rural and remote areas.

Develop a strategy to bridge the gap experienced by Australian rural and remote communities in accessing education, skills or employment opportunities. The strategy must leverage at least one of Microsoft’s technologies, be realistically deployable and scalable.

How it works

Stage 1
Teams of 1-4 submit a maximum 20 slide deck with an analysis of the challenge.

Stage 2
The best 16 teams will be invited to present their strategy to a panel of judges in Microsoft offices across the country.

Stage 3
The top 4 teams across Australia will advance to the Case Crack Challenge, in which they will analyse and present digital strategies based on a case study.

Head to our website for updates.
