

# Build your own large CECS robot!

Use this template to make your own large paper robot at home.

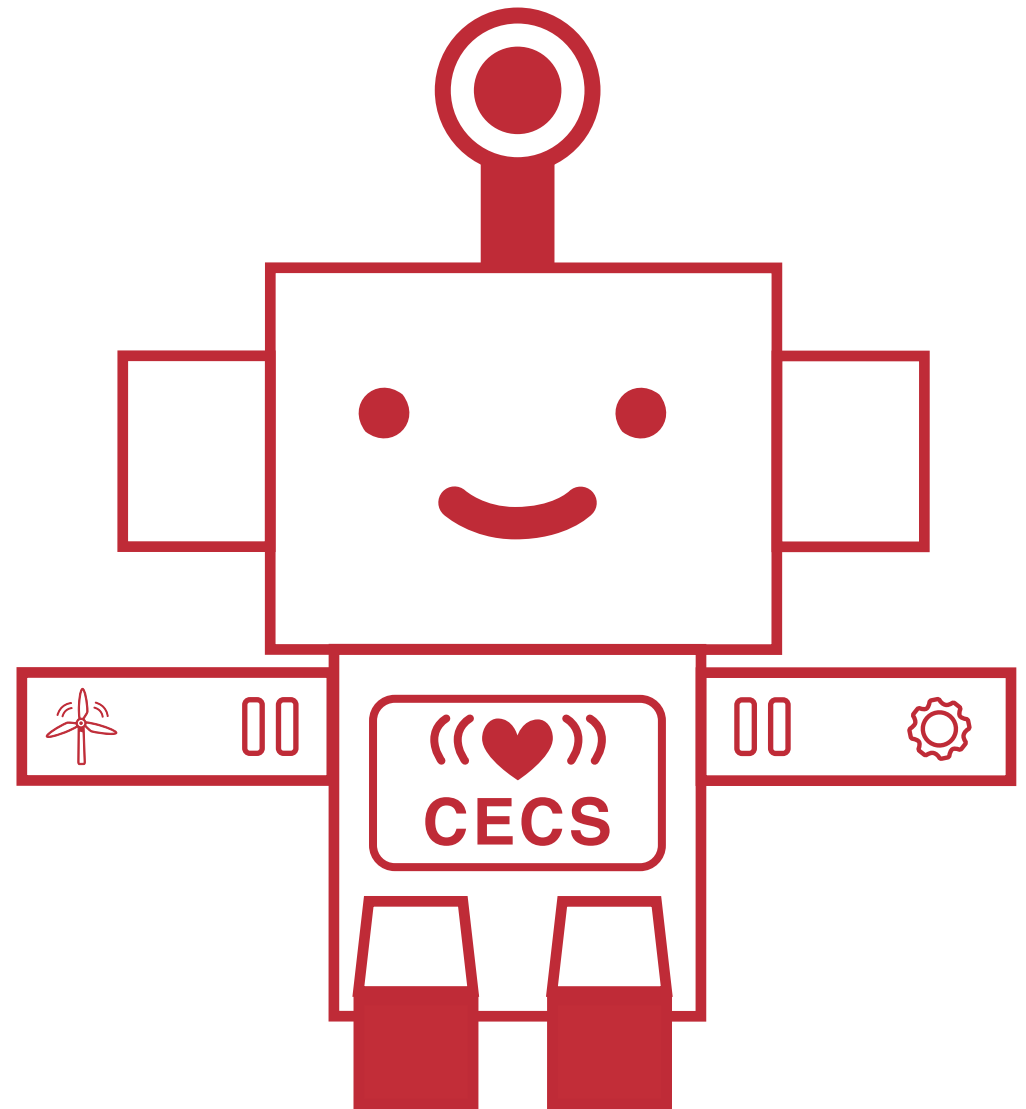

Print on two A4 pages of paper (one for the head, one for the body). Standard printer paper will do (we suggest 100-120gsm).

You can colour in or customise your robot before folding.

Share your creation and connect with us on social media [@anucecs](https://www.instagram.com/anucecs).
